EDUCATION

Annamacharya Institute of Technology and Sciences

Tirupati, India

Bachelor of Technology (B.Tech.) in Electronics and Communication Engineering

2022 – 2026

- Achieved a cumulative grade point average of **CGPA: 9.47/10.0**, ranking in the **Top 4** of the department.

EXPERIENCE

Java Full-Stack Web Development Intern

Dec 2025 – Present

Tap Academy

Bangalore, India

- Engineered** and deployed backend modules for **5+** Java full-stack web applications using **Java, JDBC, Servlets, and JSP**.
- Designed** and documented **RESTful APIs** under layered **MVC/DAO architectures** on **Apache Tomcat**, automating data transfer protocols.
- Optimized** database query latency by applying **SQL joins, aggregation, and indexing** to enhance data retrieval speeds across multi-table operations.
- Collaborated** in agile developer squads to troubleshoot backend exceptions and execute system integrations, sustaining a **99.9%** uptime rate.

TECHNICAL PROJECTS

Glow-Graph – Skincare Routine Graph Database Platform

[GitHub](#)

Spring Boot, Spring Data Neo4j, Cypher, CognoDB Cloud, RESTful APIs

- Architected** a graph-powered recommendation engine to evaluate skincare ingredient conflicts, synergies, and multi-hop sensitivity paths.
- Designed** a queryable graph database schema using **Neo4j**, writing optimized **Cypher queries** to evaluate layering relationships.
- Developed** structured **Spring Boot APIs** integrated with **CognoDB Cloud**, reducing nested relationship lookup times by **35%**.

Advanced IoT & ML Railway Safety System

[GitHub](#)

Python, TensorFlow, OpenCV, NodeMCU, Arduino, ThingSpeak & Telegram APIs

- Engineered** a machine learning crack detection classifier, training a **Convolutional Neural Network (CNN)** in **TensorFlow/OpenCV**.
- Designed** an automated IoT data pipeline utilizing **NodeMCU (ESP8266)** to stream track safety statuses to the **ThingSpeak** cloud interface.
- Automated** instant incident notifications, writing custom integration scripts to push alert payloads to mobile clients via the **Telegram API**.

ShelfBound – Full-Stack Inventory & E-Commerce Platform

[GitHub](#)

Java, MySQL, JDBC, MVC, AJAX/Fetch API, RESTful APIs, Apache Tomcat

- Architected** a secure bookstore platform featuring **2** role-specific portals (Admin/Customer) to automate inventory and checkout workflows.
- Optimized** interface responsiveness by implementing dynamic **AJAX/Fetch API** updates to synchronize shopping carts and coupon validations.
- Enforced** database protection by implementing parameterized queries with **JDBC PreparedStatement**s, preventing SQL injection vulnerabilities.

TECHNICAL SKILLS

AI & Machine Learning: CNNs, TensorFlow, OpenCV, LLM Integration, Graph Databases (Neo4j), Chatbots, Prompt Engineering

Languages: Java, SQL, Python, JavaScript (ES6+), HTML5, CSS3

Frameworks & Platforms: Spring Boot, Spring MVC, Spring Data JPA/Neo4j, Hibernate, Spring Security, Google Cloud Platform (GCP)

Developer Tools: Git, GitHub, Maven, Postman, Swagger/OpenAPI, Linux (Bash), Eclipse, VS Code

ACHIEVEMENTS & CERTIFICATIONS

- **Salesforce Agentblazer Champion (2026):** Recognized for building autonomous AI agents and workflows using Einstein AI/Agentforce.
- Achieved a **97.8% percentile** and **All India Rank (AIR) 409** in the **YOUNGTURKS'25** national assessment by Naukri Campus.
- Won **First Prize** in college-level presentation competitions and actively collaborated in **Hackathons (2023, 2024)** to build MVP solutions.
- **Certifications:** Google Cloud Computing Foundations; Generative AI & NLP (Infosys); IBM Chatbot Developer.
