

RAJYALAKSHMI DEVARALA

devaralarajyalakshmi265@gmail.com | +91 8328175792 | Portfolio | LinkedIn | GitHub

Technical Skills

Programming Languages: Java, Python, SQL

Backend and Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Java EE, JDBC, Servlets, JSP, RESTful APIs, MVC, DAO

Databases: MySQL, H2 Database

Web Technologies: HTML5, CSS3, JavaScript

Developer Tools: Git, GitHub, Maven, Postman, Swagger/OpenAPI, Linux, Apache Tomcat, Eclipse, VS Code

Computer Science: Object-Oriented Programming, Data Structures and Algorithms, Multithreading & Concurrency, Design Patterns, DBMS, SQL Optimization, Transaction Management, Debugging

Experience

Tap Academy

Java Full-Stack Web Development Intern

Bangalore, India

Dec 2025 – Present

- **Developed** backend modules for **5+ Java web applications** using Java, JDBC, Servlets, JSP, and layered MVC/DAO architecture on Apache Tomcat.
- **Built** RESTful APIs and CRUD workflows for database-driven applications while applying object-oriented programming and modular backend design.
- **Applied** SQL joins, aggregation, indexing, and database optimization techniques to support reliable data access across MySQL-backed applications.
- **Applied** multithreading and concurrency concepts alongside design patterns (Singleton, DAO, MVC) to build modular, thread-safe backend components during full-stack development tasks.

Technical Projects

ShelfBound - Full-Stack Bookstore Platform

GitHub

Java, Servlets, JSP, JDBC, MySQL, MVC, DAO, AJAX/Fetch API, RESTful APIs

- **Architected** a role-based bookstore platform with **47 Java classes**, **21 JSP pages**, and **2 role-specific portals**, supporting **10+ business modules** with session-based authorization.
- **Engineered** coupon validation, order processing, 7-day returns, and **6+ AJAX/Fetch API features** for live search, wishlist, and cart synchronization.
- **Designed** normalized MySQL schemas and implemented secure parameterized CRUD operations using JDBC PreparedStatement to prevent SQL injection.

UPI Fund Transfer Engine - Console-Based

GitHub

Java, JDBC, MySQL, Transaction Management

- **Built** a peer-to-peer UPI transaction engine with sender and receiver validation, insufficient-balance checks, and secure database operations.
- **Implemented** ACID-compliant transactions using commit, rollback, and savepoints to maintain consistency during fund transfers.

Employee Leave Management REST API

GitHub

Spring Boot, Spring Security, Spring Data JPA, Hibernate, MySQL, Swagger/OpenAPI

- **Built 11 RESTful APIs** using Spring Boot, Spring Data JPA, and Hibernate with Controller-Service-Repository architecture for leave approval, rejection, and balance tracking.
- **Developed 4 DTOs** with Jakarta Bean Validation, centralized exception handling, and API documentation using Swagger/OpenAPI and Postman.

Education

Annamacharya Institute of Technology and Sciences

Tirupati, India

Bachelor of Technology in Electronics and Communication Engineering

2022 – 2026

CGPA: 9.47/10.0 (Top 4 in Department)

Publication

IoT and Deep Learning-Based Railway Safety System

- Published technical research on integrating IoT sensing, computer vision, and deep learning for railway track safety monitoring.
- publication url : <https://isjem.com/download/predictive-and-real-time-railway-safety-solutions-using-iot-ml/>

Achievements

- Achieved **97.8 percentile** and **AIR 409** in YOUNGTURKS'25, a national-level competitive coding and aptitude assessment conducted by Naukri.
- Earned the **Salesforce Agentblazer Champion (2026)** recognition.
- Participated in **Hackathons (2023, 2024)**, developing solutions under time constraints through team collaboration.
- Won **First Prize** in college-level Craft and Video competitions for creativity and presentation excellence.

Certifications

Google Cloud Computing Foundations; Linux Training - Spoken Tutorial Project, IIT Bombay; Generative AI and NLP - Infosys Springboard; IBM Chatbot Developer; Wipro TalentNext - Digital Skills Readiness Program (2025)
